This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Recent Advances in Surgery 35 is the latest volume in a series that reviews current topics in general surgery and in its major subspecialties. Divided into five sections, this volume includes chapters on perioperative care, cardiopulmonary exercise testing for abdominal surgery, breast reconstruction, facial paralysis, a range of gastrointestinal subjects and the diabetic foot, as well as a review of randomised trials and meta-analyses in surgery. With contributions from recognised experts, the majority from throughout the UK, this new volume covers all the latest developments within surgery, providing excellent revision material for professional examinations, and helping consultant surgeons keep up to date across the speciality. Key points Latest volume in series bringing postgraduates and consultants up to date with the latest developments in general surgery and its subspecialties Includes review of randomised clinical trials and meta-analyses in surgery Contributions from recognised experts, mainly in the UK Includes more than 80 images and illustrations

Updated with an emphasis on current issues, this classic casebook emphasizes developments in international law, with expertly edited cases and problems for class discussion. Cases and Materials on International Law offers a treatment of the subject for introductory and advanced classes and detailed readings and reference materials for those who wish to pursue topics in depth. The fourth edition enriches every chapter with new information on institutions contributing to the sources and enforcement of international law, including the World Trade Organization, the International Criminal Tribunals for Yugoslavia and Rwanda, the prospective International Criminal Court, and organizations in the fields of law of the sea and arms control. International criminal law now has a chapter of its own, and the casebook gives expanded treatment to human rights, environmental law, and economic law.
